SUBJECT: ENGLISH LITERATURE

Course Outcomes (SEM 1)

After completing the course, the students will be able to:

9. Develop literary and critical thinking.
10. Enrich their knowledge of 'What is Literature?', 'Why do we study Literature? Literature and Society, Relevance of Literature in today's world.
11. Equip themselves with literary terms pertaining to Prose and will use these terms in analyzing literary texts.
12. Analyse prominent literary essays from different historical periods.
13. Comprehend, analyse and interpret prose other than the prescribed literary texts.
14. Develop their interest in reading so that they may engage in life-long learning.
15. Learn and use IPA symbols.
16. Study basics of phonology of English and will be able to pronounce effectively.

Course Outcomes (SEM II)

After completing the course, the students will be able to:

8. Develop literary and critical thinking
9. Read short stories from different cultural contexts and will comprehend that human values and emotions are universal.
10. Analyse characters, themes, setting, and atmosphere by connecting the stories with real life situations
11. Critically analyse novel 'The Old Man and Sea' by Earnest Hemingway.
12. Examine characters, point of view, setting, atmosphere, irony and other literary devices employed in the novel.
13. Equip themselves with literary terms pertaining to Fiction and will use these terms in analyzing literary texts.
14. Enrich their vocabulary and use the new words and phrases in their conversation and writing

Course Outcomes (SEM III)

After completing the course, the students will be able to:

7. Enrich their knowledge of history of English Literature from Chaucer to 18th century.
8. Familiarize with important literary terms pertaining to drama.
9. Develop their understanding of drama with the help of two literary texts- *Julius Caesar* and *She Stoops to Conquer*
10. Acquaint themselves with prominent literary texts of historical period from Chaucer to 18th Century.
11. Equip themselves with theory of drama, tragedy, literary devices pertaining to drama, setting, characters and theme.
12. Learn to connect the story with real life situations.

Course Outcomes (SEM IV)

After completing the course, the students will be able to:

9. Analyse literary masterpieces and interpret them critically in writing.
10. Develop their interest in study of classics.
11. Enrich their background of history of English Literature.
12. Comprehend, analyse and interpret classics of English other than the prescribed literary texts.
13. Learn basic nature, branches and history of linguistics.
14. Get knowledge of scientific aspect of Linguistics.
15. Acquaint themselves with Morphology, Syntax and Inflection.
16. Learn Grammatical categories and Constituent structures.

Course Outcomes (SEM V)

After completing the course, the students will be able to:

9. Enrich themselves with different historical periods- Romantic Period, Victorian Period and Modern Period.
10. Learn literary terms/concepts pertaining to drama.
11. Acquaint themselves with prominent literary texts of historical period Romantic Age to Modern Age.

12. Develop aesthetic sense by reading poems belonging to different historical periods.
13. Analyse literary devices incorporated in the texts.
14. Deconstruct the text and find out in-depth meaning.
15. Employ knowledge of literary traditions and devices to produce imaginative writing.
16. Write analytically in a variety of formats, including research papers and critical reviews.

Course Outcomes (SEM VI)

After completing the course, the students will be able to:

10. Read literary masterpieces from different cultural contexts.
11. Appreciate literature and focus on extensive reading of texts.
12. Analyse things critically and will be able to make learning process enjoyable by watching cinematic adaptations of the prescribed texts.
13. Develop their understanding of different cultures.
14. Understand that human values are universal in nature.
15. Learn cultural, political and social aspects of different countries.
16. Improve pronunciation skills
17. Acquire knowledge of Organs of Speech, Vowel, Diphthongs, Consonants and Word Accent in detail.

Sem-1 B.A-1st Year Course Outcomes:

- ❖ To understand the concept nature and scope of War
- ❖ To be thankful for the methodological pluralism and producing nature of knowledge in Defence and Strategic studies
- ❖ Have greater understanding about current knowledge and issues around the world
- ❖ To figure out the changing paradigms of War Era's;
- ❖ To explain with the Brief History, theories, approaches, concepts and principles
- ❖ To understand the administrative theories and definitions.
- ❖ To Understand Defence studies theory and concepts from multiple perspectives;

Sem-2 B.A-1st Year Course Outcomes:

- ❖ To identify the Role of the UN in Collective Security Management.
 - ❖ To make out the multi-dimensionality of problems and processes of Balance of Power
 - ❖ To understand the form and substance of Collective Security;
 - ❖ Have greater understanding about settle International Disputes with Pacific means and coercive means.
1. To comprehensively understand about the role of Industrial revolution and after that Napoleon's Art of warfare and American Civil War.

2. Students are expected to:

- Orally brief the topic and verbally present the arguments in favor and against the concepts under mention.

Sem-3 B.A-2nd Year Course Outcomes:

To comprehend the nature, scope, structure & processes of Evolution of Warfare;

- ❖ To identify the Description of the battle systems and analysis of strategy, tactics and its principles.
- ❖ To appreciate institutional capacity building strategies and programmes; and
- ❖ To understand the changing paradigms of Industrial Revolution
- ❖ Understand the way military organization and techniques of all the battles
- ❖ To know about the different types of battles and the way of fighting.

Sem-4 B.A-2nd Year Course Outcomes:

1. To acquaint with the Military Organization and techniques of fighting in the Battles.
 2. To understand the limitation of resources which used in the battle.
- ❖ To know about the different types of techniques of fighting of Kautilya's Philosophy before and after war.
 - ❖ To critically understand the powers and weaknesses and fighting of techniques of Rajputs and Turks.

Sem-5 B.A-3rd Year Course Outcomes:

- ❖ Comprehensively understand the concept the National Security, its Elements.
- ❖ Familiarity with the functionaries of Major Defence Production Industries In India.
- ❖ To Understand the internal dimension of India's Security(Militancy in Jammu and Kashmir, Insurgency in North Eastern States, Naxalism) and as well External security.
- ❖ Critically Analyze Economic Mobilization for National Defence, Planning and Production for National Defence

Sem-6 B.A-3rd Year Course Outcomes:

- ❖ To understand the historical evolution and socio-economic, political meaning about Regional security, Regional cooperation and Military Alliances.
- ❖ Need, role and type of corporatization of Armaments and Peaceful treaties.
- ❖ Understand the theoretical and practical concepts of the Armaments and Peaceful treaties.

Programme & Course Outcomes of B.A (Session 2019-20)

- ❖ To Understand the South Asian Association for Regional Cooperation (SAARC).

B.A-1, Semester-I, Subject- Sociology

Course Outcomes

- Students develop sociological perspective through sociological concepts.
- Understand the relationship between sociology and other social sciences.
- Understand the impact of social norms, social values, social organisation etc on social life.
- Understand the role of society for 'development of self'.
- Trying to understand different societies through their cultural perspectives.

B.A -1, Semester-II Subject -Sociology

Course Outcomes

- Students able to know cooperation, accommodation, assimilation as processes of integration and competition, conflict as processes of disintegration occur in society.
- Students find out that how social groups like primary group, secondary group, in-group, out-group etc are made.
- Students realise the importance and functions of family, marriage and kinship in social life.
- Students understand negative and positive functions of religion in society.
- Students identify how society control human behaviour in society through its controlling agencies.

B.A-2, Semester- III, Subject-Sociology

Course Outcomes

- Students able to learn ranking system in society and societies are different based on the degree of inequality.
- The course examines how race, class, gender, age, caste etc intersect in the structure of a given society.
- Analyse change in marriage and family patterns. Recognise forms of family and marriage. Understand the problem of family abuse and impact of divorce.
- Students can present scientific picture of rural life and find distinctions between rural, urban, and tribal life.
- The course presents lifestyle of tribal people and help to understand various government schemes and difficulties faced by tribal people.

B.A-2, Semester-IV, Subject- Sociology

Course Outcomes

Programme & Course Outcomes of B.A (Session 2019-20)

- Student able to learn Meaning of social change And understand how changes occur in form of evolution, revolution, social development and progress.
- The course notices the processes of social change in Indian society through Sanskritization, Westernisation, Urbanisation, Modernisation and Globalisation.
- Students learn historical background of panchayati Raj institution And also find out composition of Village panchayat, Block Samiti & Zilla parishad (Three tier system).
- Students find out the planned program enforced by government like Community Development Program and Mahatma Gandhi National Rural Employment Guarantee Act for upliftment of Rural people and rural society.

B.A-3, Semester- V, Subject-Sociology

Course Outcomes

- Students are able to understand unilinear theory of evolution of a society and human mind through law of Three stages given by Auguste Comte.
- Karl Marx's most popular theory was 'Historical Materialism' argues that history is the result of material. Student also learn class struggle between ruling class and subject class through theory of 'Class struggle and social change.'
- Students find out how division of Labour is key of social solidarity in modern society as well as in primitive society.
- Students able to learn that suicide is a social fact. It is not a geographical, psychological and other fact.
- Students able to understand social phenomena through sociological perspective and develop an analytical mind.

B.A-3, Semester-VI, Subject- Sociology

Course Outcomes

- The ability to use scientific research methods to address sociological questions.
- To train students to understand and interpreted objectivity.
- The ability to express and communicate sociological knowledge to others.
- The ability to conduct a scientific and systematic research to understand social problem or social phenomena.
- To train students in research to use tools of data collection and tools of data analysis for a better research.

HISTORY (BA) COURSE OBJECTIVES/OUTCOMES

SEM-1: B.A-1st YEAR

OUTCOMES:

After completing the course, the students will be able to:

- Understand the meaning of History, its emergence, and relationship with social science.
- Explain the nature and scope of History □
- Understand the types of History, like Ancient, Medieval, Modern etc.
- Students identify different types of sources. Archaeological Sources and Literary sources and its importance in history.
- Draw maps, charts, diagrams, etc. □
- Prepare models, tools, etc
- Read historical documents, maps and charts.
- Visit places of historical interests, archaeological sites, museums and archives.

SEM 2nd: B. A 1st YEAR

OUTCOMES:

- To study the facts, terms, concepts, events, etc. □
- Recognize facts, terms, concepts, events, etc. □
- To explore the information on maps, charts, diagrams, etc.
- Read information presented in various forms.
- Participate in historical dramas and mock sessions of historical events.
- Possess the sense of patriotism.
- Show respect towards other people's opinion, ideas, beliefs and ways of life. □
- Read about other faiths and religions. □
- Establish friendship with pupils of other communities and faiths. □
- Practice the spirit of noble ideal. □
- Cooperate with others in the social and civic activities.

SEM 3rd: B. A 2nd YEAR

OUTCOMES:

- Classify facts, events, terms, and concepts, etc. □

- Illustrate events, trends, etc., by citing examples. □
- Compare and contrast the events, trends and concepts, etc. □
- Explain events, terms, and concepts, causes and effects, trends, etc. □
- Discriminate between the significant and insignificant, important and less important causes, effects events, etc. □
- Identify relationship between cause and effect, means and ends. □
- Arrange facts, trends, etc., in a particular known order. □
- Interpret the maps, charts, etc.
- Write articles on historical and other related topics.

SEM 4th: B. A 2nd YEAR

OUTCOMES:

After completing the course, the students will be able to

- Participate in debates and other forms of verbal historical discussion.
- Deliver a historical presentation orally.
- Identify biases of the authors of sources.
- Frame and answer historical questions
- Students will describe historical events from multiple perspectives.
- Students will formulate, sustain, and justify a historical argument using original ideas.
- Students will support arguments with historical evidence drawn from primary and secondary sources.
- Students will learn to understand, analyze, and evaluate both evidence and arguments.
- Students will learn to explain how and why important events happen and change over time occurs.
- Students will learn to create knowledge and communicate it to others both orally and in writing.

SEM 5th:B.A 3rd YEAR

OUTCOMES:

- Understand the role of history in developing international understanding.
- Students will demonstrate knowledge of the chronology, narrative, major events, personalities and turning points of the history of the England, Europe, Asia and non-Western area.
- Students will offer multi-causal explanations of major historical developments based on a contextualized analysis of interrelated political, social, economic, cultural and intellectual processes.
- Students will correctly extract evidence from primary sources by analyzing and evaluating them in relation to their cultural and historical context and use that evidence to build and support an argument.
- Students will evaluate secondary historical sources by analyzing them in relation to the evidence that supports them, their theoretical frameworks, and other secondary historical literature.
- A glance at world map gives idea as to how closer are the countries to each other. Students will learn the general course of human history in multiple areas of the world.
- Students will learn to understand the world contextually, that is, to interpret human experiences and the meanings people have given them in relationship to the place and time in which they occurred.
- The ability to think historically: identifying the unique characteristics of past eras, articulating causality, and analyzing change over time.
- The ability to interpret in their historical contexts an array of primary sources, including manuscripts, artifacts, quantitative, oral or visual sources.

SEM 6th: B.A 3rd YEAR

OUTCOMES:

- Students Identify the biases and overcome it
- Students will frame research questions.
- Students will access appropriate primary and secondary sources.
- Explain the principles of selecting History curriculum at different levels Describe the different approaches in arrangement of content in history
- Students will assess the reliability of sources and evaluate their content.

Students will use sources to contextualize historical events and describe change over time

- Students will produce written evidence of research competence. The ability to engage critically with historical argument: identifying underlying theories, assumptions, and approaches.
- The ability to conduct original historical research using primary and secondary sources, and placing one's own work within historical debates.
- The ability to communicate historical knowledge, interpretations, and arguments clearly in writing, oral presentations, or public history projects.

➤ **B.A. Mathematics**

➤ **Program Outcomes:**

- **PO 1:** Bachelor's degree in mathematics is the culmination of in-depth knowledge of algebra, calculus, geometry, differential equations and several other branches of mathematics. This also leads to a study of related areas like computer science and statistics. Thus, this programme helps learners in building a solid foundation for higher studies in mathematics.
- **PO 2:** This programme will also help students to enhance their employability for government jobs, jobs in banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

➤ **Semester-I**

- Paper-I Calculus-I
- Paper-II Differential Equations
- Paper-III Co-ordinate Geometry

➤ **Semester-II**

- Paper-IV Algebra- I
- Paper-V Partial Differential Equation
- Paper-VI Analytic Geometry

➤ **Course Outcomes:** After Completion of the course the student will be able to:

➤ **Calculus-I**

- **CO 1:** Understand the concept of derivatives and use it to find curvature.
- **CO 2:** Understand and apply the concept of limit, continuity of a function at a point to find Concavity and convexity, Asymptotes and Tracing of curves.
- **CO 3:** Exhibit and recall previous learning in integrals and use to study Improper integrals.
- **CO 4:** Apply and deduce Area and volume of two dimensional surfaces.
- **CO 5:** Investigate convergence and divergence of Improper integrals, Dirichlet integrals and some special functions.

➤ **Differential Equations**

- **CO-1:** Recognize various definitions of linear homogeneous and nonhomogeneous differential equations.

Programme & Course Outcomes of B.A (Session 2019-20)

- **CO-2:** Understand various methods to solve second order linear differential equation with constant and variable coefficients.
- **CO-3:** Obtain power series solutions of several important classes of ordinary differential equations including Bessel's, Legendre differential equations. Also able to derive the generating functions and recurrence relations, orthogonality properties and interpret their qualitative behaviour.
- **CO-4:** Discover the use of Bessel, Legendre's, Hermite's equations in real-life problems.
- **Coordinate Geometry**
- **CO-1:** Understand and recall the importance of general equation of second degree in co-ordinate geometry.
- **CO-2:** Obtain tangent, normal, chord of contact, and other geometrical properties.
- **CO-3:** Apply above geometrical properties in real-life problems
- **CO-4:** Investigate the nature of second degree equation of a curve.
- **CO 5:** Demonstrate their knowledge of geometry and its applications in the real world.
- **Algebra- I**
- **CO 1:** Recognize consistent and inconsistent systems of linear equations by the row echelon form of the augmented matrix, using rank.
- **CO 2:** Find eigenvalues and corresponding eigenvectors for a square matrix
- **CO 3:** Understand the importance of roots of polynomials and learn various methods of obtaining roots.
- **CO 4:** Employ De Moivre's theorem in several applications to solve numerical problems.
- **CO 5:** Execute their good understanding of the deeper concepts of linear algebra and abstract algebra.
- **Partial Differential Equation**
- **CO 1:** Solve the first-order linear PDE's with the aid of Lagrange's method and non-linear PDEs of first order with Charpit's method.
- **CO 2:** Derive solutions of linear PDEs of second and higher order with constant coefficients.
- **CO 3:** Use the method of separation of variables and other techniques to solve some basic hyperbolic, parabolic and elliptic partial differential equations.
- **CO 4:** Execute their learning in solving heat, wave, Laplace equations.
- **CO 5:** Solve PDE governing real life phenomenon arising in various fields of science and engineering.
-
-
-
- **Analytic Geometry**
-
-
- **CO 1:** Understand and apply appropriate techniques, tools, and formulae to determine various geometrical parameters.
- **CO 2:** Find Equation of a tangent plane, Condition of tangency, Angle of the intersection of two spheres, Length of a tangent, Radical plane, Coaxial system of spheres and other geometrical properties

Programme & Course Outcomes of B.A (Session 2019-20)

- **CO 3:** Analyze characteristics and properties of two- and three-dimensional geometric shapes and their geometric relationships.
- **CO 4:** Relate and integrate geometry into real life contexts as well as into other disciplines.

➤

Semester-III

- Paper-I Advanced Calculus
- Paper-II Analysis-I
- Paper-III Statics

➤

Semester-IV

- Paper-IV Numerical Methods
- Paper-V Analysis-II
- Paper-VI Dynamics

➤ **Course Outcomes:** After completion of the course the student will be able to:

➤

Advanced Calculus

➤

- **CO 1:** Understand the concept of Limit, Continuity of Functions of several variables. Differentiability of real-valued functions of two variables.
- **CO 2:** Understand the use of partial derivatives in Taylor's theorem, error estimation, and to Find Maximum and Minimum values of real-life situations.
- **CO 3:** Exhibit and recall previous learning in Calculus of one variable
- **CO 4:** Apply the concept of multiple Integrals to evaluate Areas, Volume, Centre of Gravity and Moments of Inertia and other physical quantities.
- **CO 5:** Develop and execute their understanding to solve differential equations.

➤

Analysis-I

- **CO 1:** Understand the concept of Function of Bounded Variations and Riemann Integration
- **CO 2:** Analyze and relate sequences and series of real values functions in terms of convergence in and divergence in \mathbb{R}^2 .
- **CO 3:** Implement logical thinking to prove the basic results of real analysis.
- **CO 4:** Relate the concept of infinite series and Improper Integrals.
- **CO 5:** Develop and execute these concepts to probability theory, Fourier series, and other branches of mathematics.

Statics

- **CO 1:** Understand the necessary conditions for equilibrium of particles acted upon by
 - the number of forces.
- **CO 2:** Understand the reduction of force system to a resultant force and a resultant couple.
- **CO 3:** Define and determine the center of gravity of some materialistic systems.

Programme & Course Outcomes of B.A (Session 2019-20)

- **CO 4:** Demonstrate the concept of friction and identify types of friction.
- **CO 5:** Formulate the knowledge of statics to higher courses like the theory of elasticity, fluid
- mechanics etc.
-
- **Numerical Analysis**
- **CO 1:** Understand the errors, source of error and its effect on any computation.
- **CO 2:** Obtain numerical solutions of algebraic and transcendental equations.
- **CO 3:** Tabulate the functions and data set using interpolation.
- **CO 4:** Apply course knowledge to solve complicated physical problems by approximating to the desired accuracy.
- **Analysis-II**
-
- **CO 1:** Understand the Concept of Point-wise and Uniform convergence of sequence and series of functions with special reference to power Series.
- **CO 2:** Identify and discuss the convergence of sequence and series of functions
- **CO 3:** Evaluate Line, surface and volume integrals
- **CO 4:** Identify and apply Greens Theorem, Stokes Theorem, and the Divergence Theorem.
- **CO 5:** Investigate the Theory of Vector Calculus with relevant examples.
- **Dynamics**
-
- **CO 1:** Understand the laws of motion and dynamics involved in projectile motion, Simple Harmonic function etc.
- **CO 2:** Understand the concepts of work, power, energy, momentum and relative motion.
- **CO 3:** Apply the laws of motion to solve physical problems.
- **CO 4:** Investigate and formulate the concept of mathematical modeling in projectile motion.
- **CO 5:** Use and derive some of the basic definitions and theorems related to dynamics.
-
- **Semester-V**
- Paper-I Algebra-I
- Paper-II Discrete Mathematics-I
- Opt-I Mathematical Methods-I
- Opt-II Number Theory-I
- **Semester-VI**
- Paper-III Algebra-II
- Paper-IV Discrete Mathematics-II
- Opt-III Mathematical Methods-II
- Opt-IV Number Theory-II

Programme & Course Outcomes of B.A (Session 2019-20)

➤ **Course Outcomes:** After completion of the course the student will be able to:

➤

➤ **Algebra-I**

➤ **CO-1:** Determine whether a given set and binary operation form a group by checking group axioms

➤ **CO-2:** Understand and Differentiate between homomorphism and isomorphism for groups and Rings.

➤ **CO-3:** Differentiate between dihedral, symmetric and alternating groups, rings, derive the existence of groups of a specified small order

➤ **CO-4:** Develop new structures based on given structures and compare the structures.

➤

➤ **CO-5:** Implement abstract and critical reasoning by studying logical proofs and the axiomatic method as applied to modern algebra.

➤ **Discrete Mathematics-1**

➤

➤ **CO-1:** Understand and Define basic notations in graph theory & trees.

➤ **CO-2:** Construct the Passwords by using the techniques of counting principles

➤ **CO-3:** Use the shortest path algorithm to determine the fastest driving routes.

➤ **CO-4:** Construct Model problems in Computer Science using graphs and trees.

➤ **CO-5:** Learn how to work with some of the discrete structures which include sets, relations, functions, graphs and trees.

➤ **CO 6:** Solve real-life problems using finite-state machines.

➤ **CO-7:** Assimilate various graph theoretic concepts and familiarize them with their applications.

➤ **Number Theory – I**

➤ **CO1** :- Understand the concept of congruences, residue classes and reduced residue classes.

➤ **CO2** :- Find the greatest common factor using the Euclidean Algorithm.

➤ **CO3** :- Use Wilson's Theorem and Fermat's Theorem as the basis for primality tests and factoring algorithms.

➤ **CO4** :- Apply Public-Key cryptology to encrypt and decrypt a message.

➤ **CO5** :- Apply congruences to detect errors in strings of digits.

➤

➤ **Mathematical Methods I**

➤ **CO-1:** Demonstrate their understanding of the Dirichlet conditions.

Programme & Course Outcomes of B.A (Session 2019-20)

- **CO-2:** Solve both real and complex forms of the Fourier series for standard periodic waveforms
- **CO-3:** Know about piecewise continuous functions, Dirac delta function, Laplace transforms
- and its properties
- **CO 4:** Investigate the application of course in various engineering fields.
- **Algebra- II**
- **CO-1:** Understand real vector spaces, subspaces, basis, dimension, and their properties
- **CO-2:** Use the definition and properties of linear transformations and matrices of linear transformations.
- **CO 3:** Obtain various variants of diagonalization of linear transformations.
- **CO-4:** Apply the knowledge of linear algebra to solve the system of differential equations.
- **CO-5:** Explain the use of linear algebra in coding theory, linear programming, and cryptography.
-
- **Discrete Mathematics-II**
- **CO 1:** Understand and solve Binary relations and recurrence relations, direct and indirect proofs.
- **CO 2:** Construct mathematical arguments using logical connectives and quantifiers.
- **CO 3:** Validate the correctness of an argument using statement and predicate calculus.
- **CO 3:** Develop an inductive way of thinking.
- **CO 4:** Interpret and investigate applications of Boolean algebra and Boolean functions, logic gates, switching circuits in electronics.
-
- **Mathematical Methods-II**
- **CO-1:** Understand Fourier Transform and inverse Fourier transform.
- **CO-3:** Determine the solution of differential equations with initial and boundary value problems by choosing the most suitable method.
- **CO-4:** Apply Laplace transform techniques to solve Heat, Wave & Laplace equations.
- **CO 5:** Apply and formulate integral transform techniques applied to various situations in physics, engineering, and other mathematical contexts.
-
- **Number Theory – II**
- **CO1** :- Understand the concept of Diophantine equations, Farey sequences and continued Fractions.
- **CO2** :- Define Pell's equations, The Partitions and Abel's Identity.

- CO3 :- Use Minkowski's theorem to solve Diophantine inequalities.
- CO4 :- Derive elementary results on distribution of primes.
- CO5 :- Apply theorems on quadratic forms to find the number of representations.

PSYCHOLOGY (BA) COURSE OBJECTIVES/OUTCOMES

SEM-1: B.A-1st YEAR

OUTCOMES:

After completing the course, the students will be able to:

1. Understand the meaning of Psychology, its emergence, and relationship with science.
2. Explore the different methods to understand the human behaviour.
3. Understand the conditioning and types of conditioning, and its application to study the human behaviour.
4. The use of mean, median, mode and other statistical methods in Psychology.
5. Understand the meaning of personality in psychological terms.
6. Understand and explore the subfields and career in Psychology.

SEM 2nd: B. A 1st YEAR

OUTCOMES:

After completing the course, the students will be able to

2. Use classical and operant conditioning in daily life.
3. Explore the role of reinforcement on learning and how it affects the behavior of individual.
4. To use the statistical measures in daily life.
5. The application of statistics in psychology

SEM 3rd: B. A 2nd YEAR

OUTCOMES:

Students after completing the course, will be able to:

1. Explore connectivity of left and right hemisphere of brain in functioning of body.
2. Gather the practical application to measure intelligence and motivation.
3. Use the motivational skills in practical life to boost confidence and strength.
4. To control emotions and which parts of body play important role in regulation of emotions.
5. To measure the I.Q level of humans.
6. To measure the E.Q level of humans.

SEM 4th: B. A 2nd YEAR

OUTCOMES:

After completing the course, the students will be able to

1. Use weber' law and method of limits to find out the just noticeable difference.
2. To understand the role of parts of eyes and ear, and to know what are the possible reasons for deafness, blindness.
3. To understand the working of tongue and taste buds and explore reasons that how a person become blind of smell.
4. To know how one can perform multi tasking and what is selective attention. These processes can benefit students for making preparations of syllabus for exams.
5. To understand the reason that why the things are not same for all individuals, the way one see the world is different for other seeing the world.

SEM 5th:B.A 3rd YEAR

OUTCOMES:

After completing the course, students will be able to:

1. Differentiate between a person with normal functioning and abnormal functioning.
2. Explain the theoretical framework of abnormality and causes of abnormality.

3. Explain the causes of anxiety based disorders and treatments for these disorders.
4. To explain the guidelines of psychology according to the APA standards.
5. To know about the effectiveness of correlation in psychology.

SEM 6th: B.A 3rd YEAR

OUTCOMES:

1. Students will be able to know the relation of body with mind that how their imbalance can result in psychosomatic disorder.
2. Students will be able to know the counselling techniques to treat people with abnormal behaviour.
3. Students will be able to identify the various drugs that are used and treatment of those people who are addicted to those drugs.
4. Students will be able to know about schizophrenia and mood disorders and their prevalence in humans.

GEOGRAPHY

PAPER OBJECTIVES & COURSE OUTCOMES

B.A. – Ist Year

Semester – I: Geomorphology

Course Outcomes (COs):

2. Comprehend the fundamental geomorphological concepts and the key ideas such as that 'Present is the key to the Past.'

3. Understand that the processes shaping the present landscape have always been at work since times immemorial.

Semester – II: Climatology and Oceanography

Couse Outcomes (COs):

After the completion of this course, the students will have:

1. A better understanding of concepts of Weather and Climate.
2. A better understanding of the various elements and controls of climate.
3. An understanding and appreciation of the various climatic patterns in the world.
4. They will also have a deep understanding and appreciation of Oceans and various geographical phenomena related to them.

B.A. –IInd Year

Semester – III: Geography of Resources and Environment

Course Outcomes (COs):

After completion of this course the students will have:

1. A broad knowledge and deep understanding of the concept of Resources.
2. They will be able to comprehend the Distribution, Utilization, and Conservation aspects of the Resources in a very scientific manner.
3. An understanding of the various environmental challenges in the context of the resource utilization.

Semester – IV: Geography of Punjab

Course Outcomes (COs):

After the completion of this course, the students will be able to:

1. Comprehend all aspects of Total Geographical Character of the Indian state of Punjab.
2. Have in-depth knowledge about the physiographic, demographic, and economic aspects of the Geography of Punjab.
3. Understand the regional variations within the state

B.A. –IIIrd Year

Semester – V: World Regional Geography – Part I

Course Outcomes (COs):

After the completion of this course the students will have:

1. A clear understanding and comprehension of the Idiographic Character of different macro-regions of the world.

2. An in-depth knowledge and understanding of the geographical patterns and processes responsible for those patterns obtaining within a given macro geographical region.
3. They will develop a keen locational understanding of various aspects of World Regional Geography through the study of phenomenal maps.

Semester – VI: World Regional Geography – Part II

Course Outcomes (COs):

After the completion of this course the students will have:

1. A clear understanding and comprehension of the Idiographic Character of different macro-regions of the world.
2. An in-depth knowledge and understanding of the geographical patterns and processes responsible for those patterns obtaining within a given macro geographical region.
3. They will develop a keen locational understanding of various aspects of World Regional Geography through the study of phenomenal maps.

Music Vocal

B.A. –I Sem. I

Course Outcomes
